Our Business

Cultivate & Evolve

SLC AGRÍCOLA

SLC AGRÍCOLA

Our Business

What?

Production of **cotton**, **soybean**, **corn**, **seeds and cattle finishing**.

Where?

In **8 states** of the Brazilian *Cerrado* Region.

How?

On both **owned** and **leased** land, large scale farms.

To Whom?

Grains: Tradings, Animal Feed and Food Ind.

Cotton: Tradings and Textile Ind.

Seeds: Agricultural Producers.

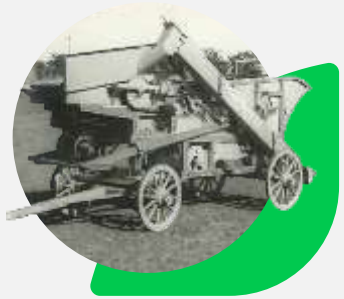

Cattle: Food industry and meat processors

SLC AGRÍCOLA

80 years in Agriculture

1945

Foundation of SLC, as a small repair shop for agricultural implements

1965

SLC makes the first Brazilian self-propelled grain harvester

1979

John Deere buys 20% stake in SLC's Agricultural machinery business

1977

Foundation of **SLC Agrícola**

1999

SLC sells 100% of the ag-machinery business to **John Deere**

2007

SLC Agrícola IPO (the first in its sector, globally)

2010

Joint venture with **Valiance Asset Management Limited**, a UK investment fund and creation of **SLC LandCo**

August, 2021
End of the cycle of opening new areas for crop.

2013

Creation of the Joint venture with **Mitsui & Co., Ltd**

2021

Incorporation of the agricultural operations of Terra Santa Agro. **5 leased farms in MT**

2025

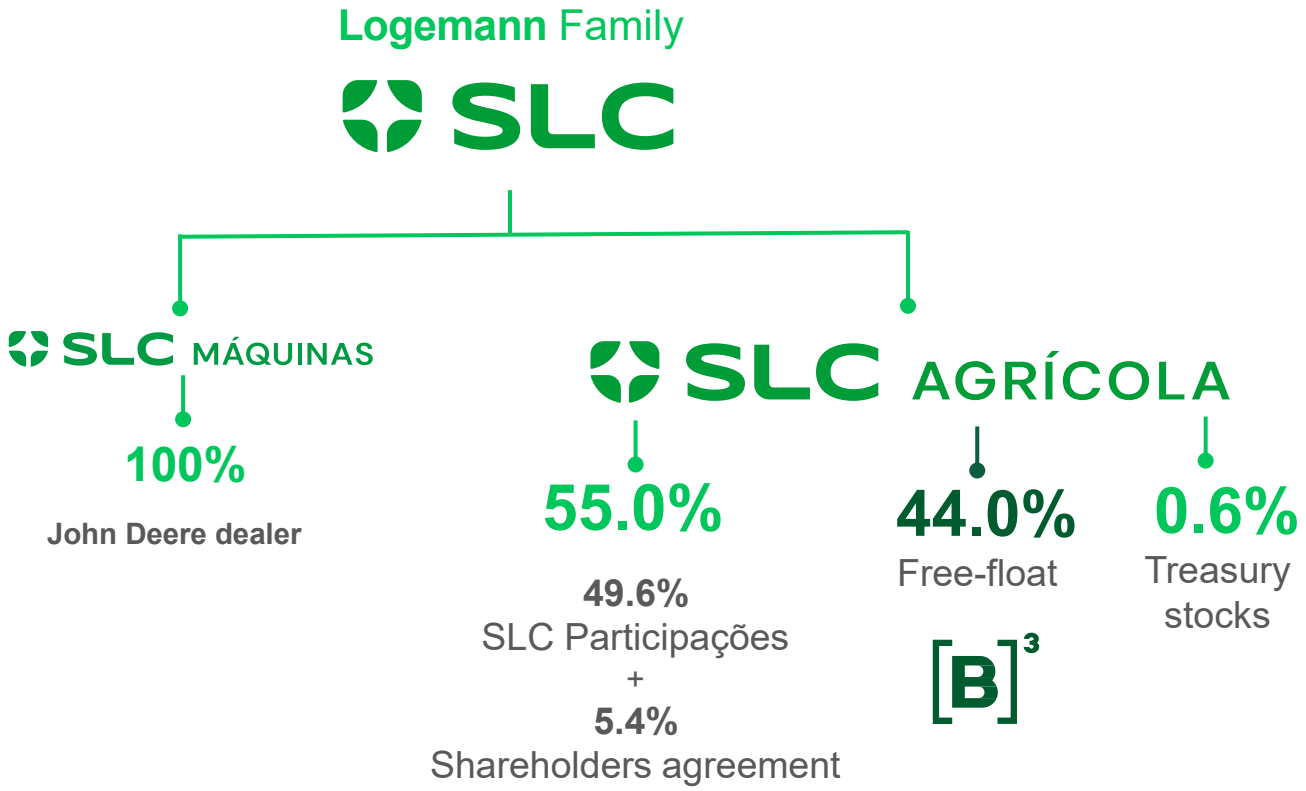

Acquisition of **Sierentz** and **Association Agreement with BTG FIPs** and the full acquisition of the JV with **Mitsui & Co., Ltd**, incorporating farmland assets in Bahia and Mato Grosso

2024

Acquisition of the minority interest in **SLC LandCo**

Shareholding Structure

Last update: October, 2026.

- **Total shares issued:** 498,745,930 Level 1 – ADR

- Program: Launched August 11th, 2011 – Ticker SLCJY

- Executives and related parties connected to the SLC Group hold **0.4**% of the shares and are considered in the Free Float.

Strategy & Capital allocation

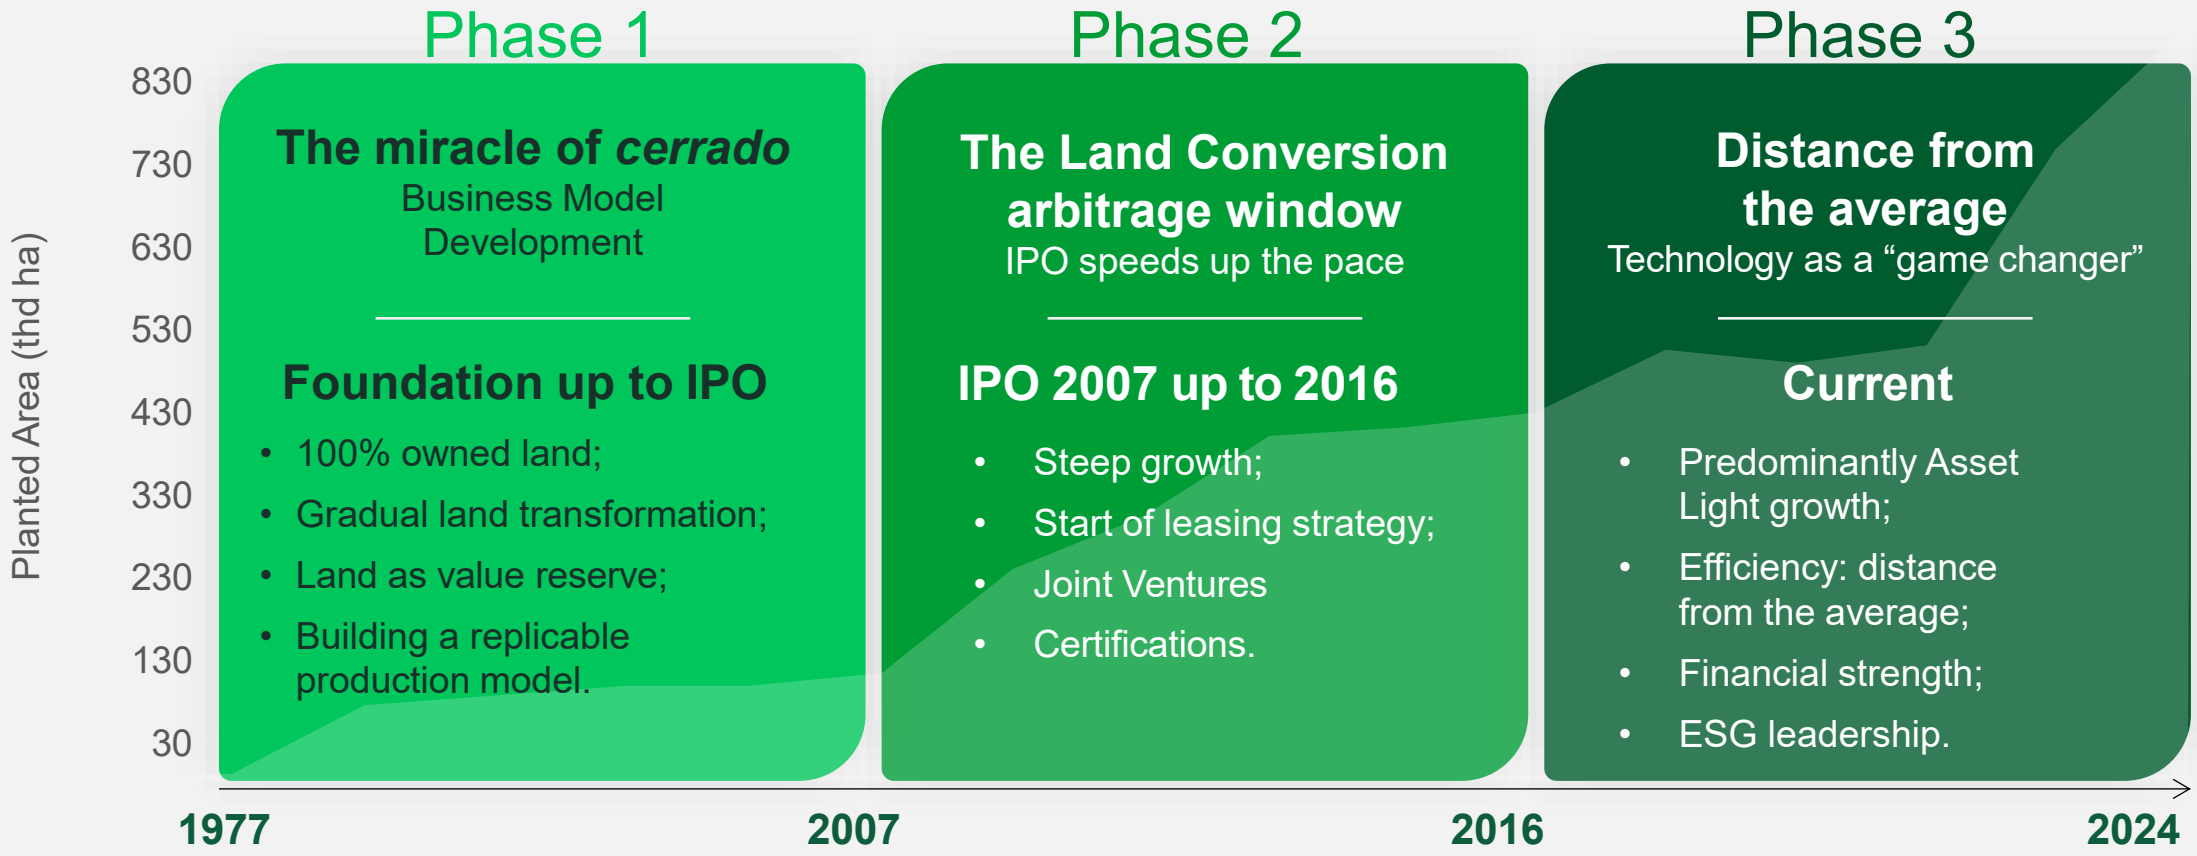

Cultivate & Evolve

SLC AGRÍCOLA

Our strategy in 3 phases

SLC has made great use of the main opportunities in Brazilian agribusiness in recent decades

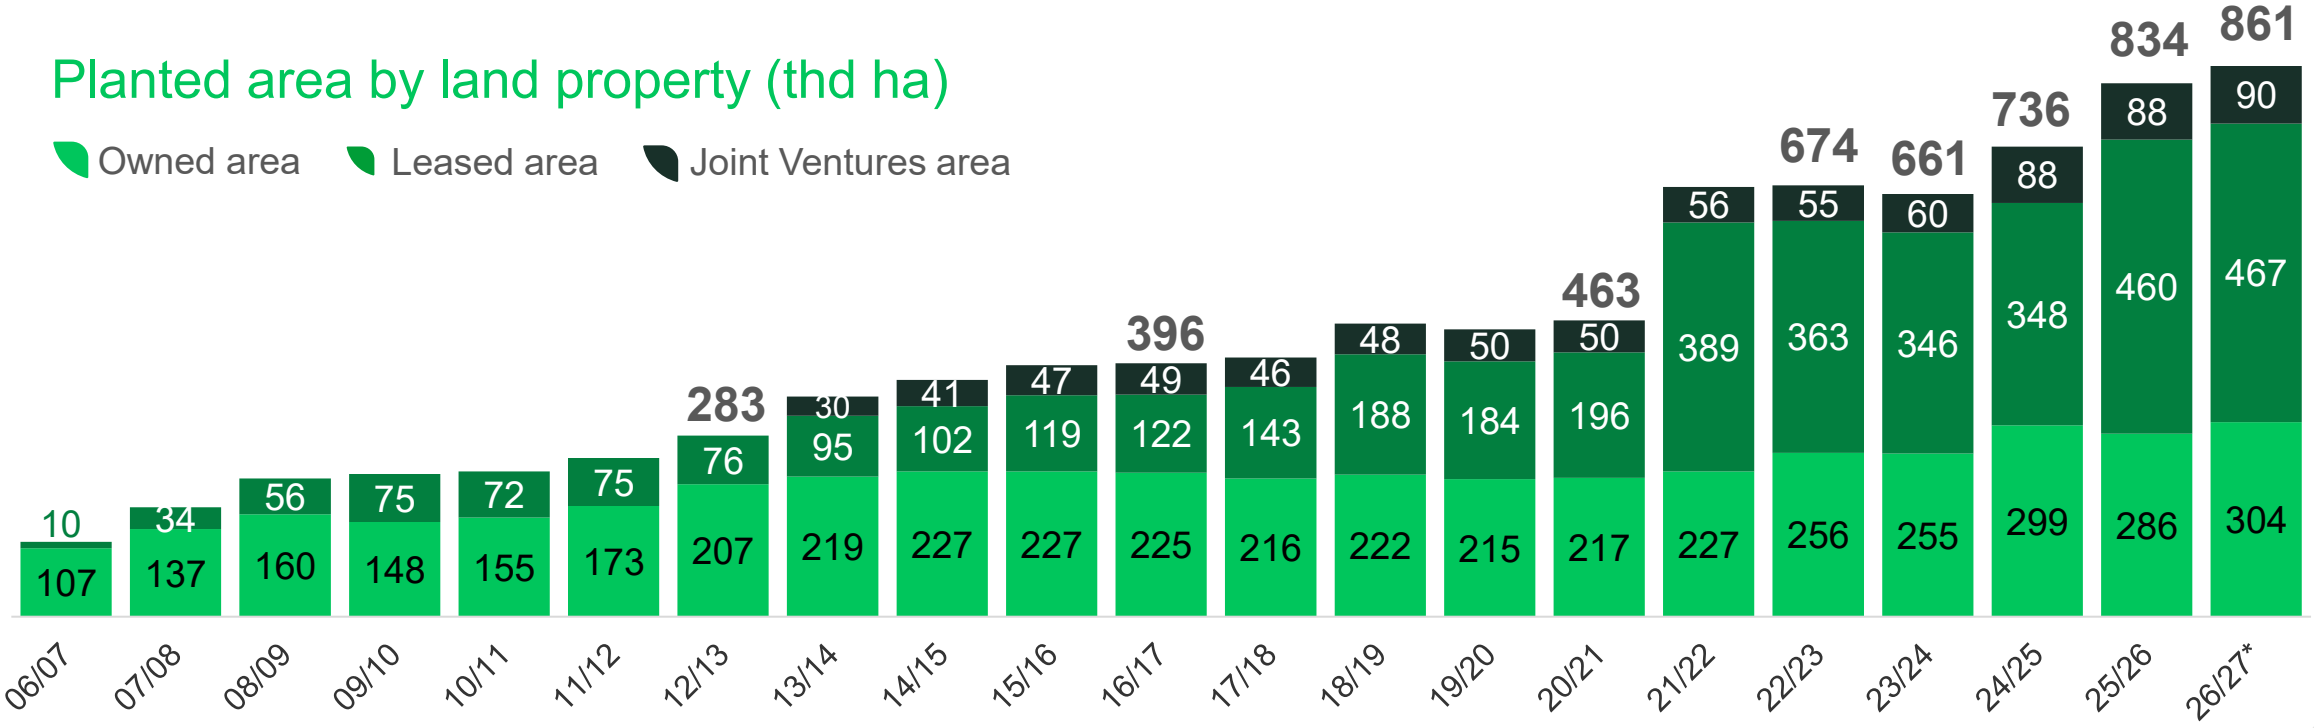

Migration to asset-light model

In the 2026/2027 crop year:

63% of physical area comes from leasing & joint ventures (1st crop)

Planted area by land property (thd ha)

Source: 3Q26 Release

*Forecast

The Company considers the leased area as: leased area of the first crop plus the first crop area of the Joint Ventures, divided by the total planted area of the first crop = 63%

Capital allocation

Growth in mature areas with high productive potential

Pasture conversion

Dividend payment

Shares buyback

New projects

SLC SEMENTES

10

Technology & innovation

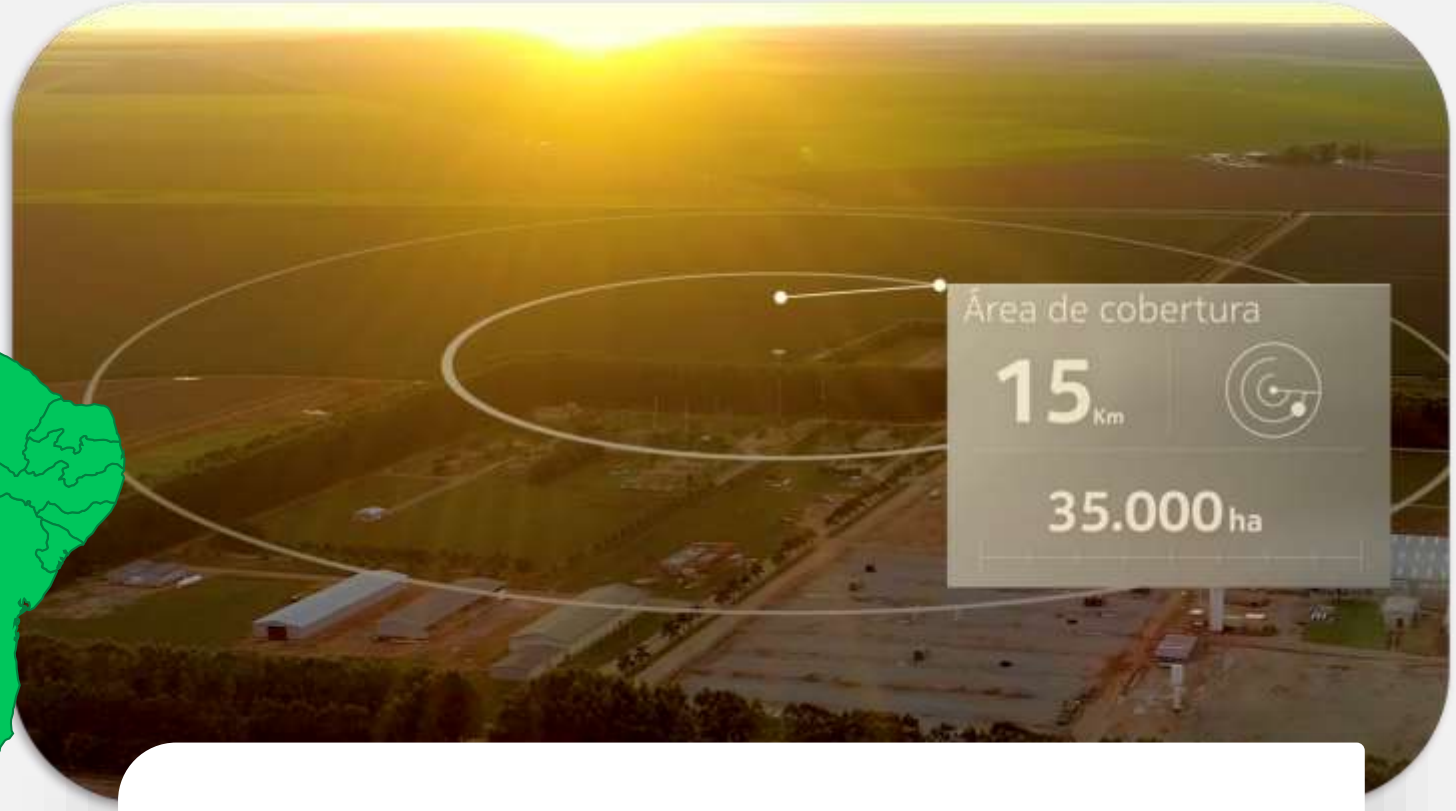

Cultivate & Evolve

SLC AGRÍCOLA

Connectivity

24 Farms

fully connected in all fields with 4G signal.

SLC AGRÍCOLA

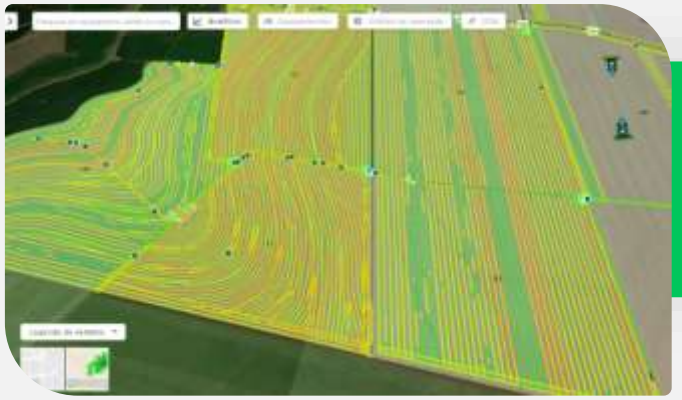

Spraying operation

Adjusting engine speed **(rpm)** and reducing fuel consumption

Reduction in fuel consumption:
0.79 to 0.58 L/ha

-27%

Before

Pantanal Farm

Yellow and orange colors indicate higher engine rotation > higher fuel consumption.

After

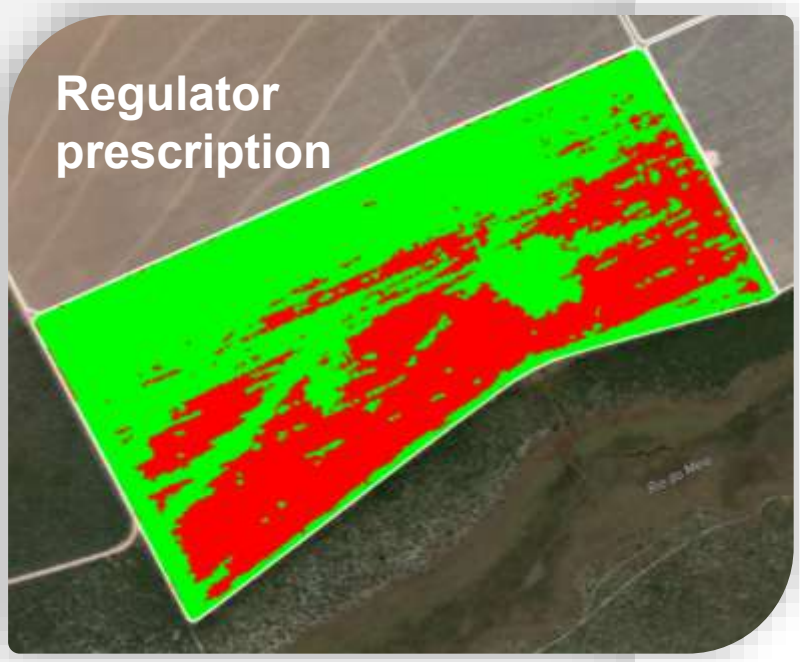

RPM reduction of 2,100/2,300 to 1,500/1,900.

NDVI Maps | Application regulator and site-specific application of defoliants

Daily satellite imagery enables vegetation index-based application prescriptions.

Variable-rate application of cotton growth regulator and site-specific application of defoliants for soybean and cotton.

In 2024/25, **64,062 ha** applied with imagery (**satellite image**).

Higher regulator dose

Lower regulator dose

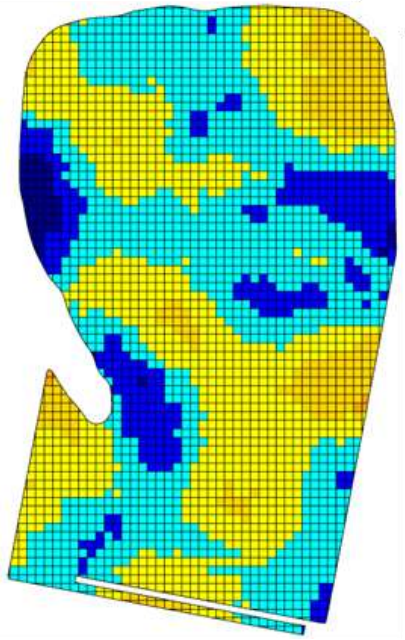

*The company does not use NDVI maps for productivity estimates.

Precision agriculture

Fertility Variability Maps

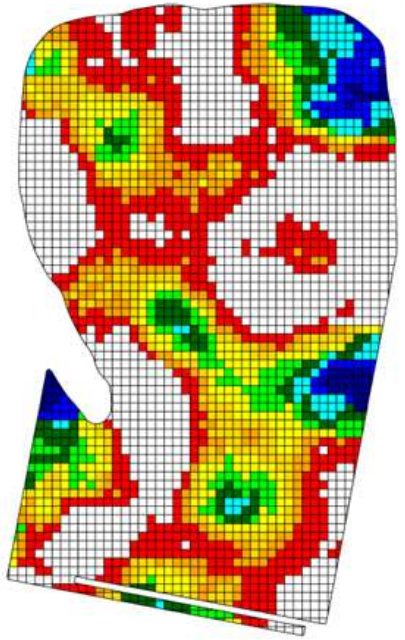

100% of SLC Agrícola's crops **already mapped** in precision agriculture.

Fertility variability map

- Low fertility
- Adequate fertility

Fertilizer prescription at variable rate

- Increased productive potential
- Cost reduction

Related to the 2025/26 crop year.

Our commitments

Reduction of greenhouse gases

By 2030 - our goal is to achieve **carbon neutral** emissions of ghg gases scope 1 and 2, through investment in new technologies in the field and agroindustry.

End of the cycle of opening new areas for crops in Brazil

As of the 2020/21 crop, we **ended the cycle of opening new areas** for crops, following the global movement to combat climate change.

Greenhouse Gas Emissions Reduction Program - GHG

Carbon neutrality
in net scope 1 and 2 until 2030

Registro Público de Emissões
Programa Brasileiro GHG Protocol

- End of the native areas conversion cycle.
- Soil Conservation and Green Fertilization Project.
- ILP Project (Integration Crop Livestock).
- Digital Agriculture of Low Carbon Project.
- Reforestation Project with Native Vegetation.
- Project Use of Energy from Renewable Sources.

´Regenerative agriculture

regenagri

325.8 thd ha certified

We are **the largest company in certified regenerative** agriculture area in soybean and cotton in the Americas.

Goal: 550.864 ha by 2030

The certification supports and attests organizations in transitioning to regenerative agriculture techniques that:

- Increase soil organic matter.
- Promote biodiversity.
- Reduce greenhouse gas emissions (GHG).
- Remove CO^2e and improve water and energy management

Disclaimer

We make forward-looking statements that are subject to risks and uncertainties. These statements are based on the beliefs and assumptions of our management, and on information currently available to us. Forward-looking statements include statements regarding our intent, belief or current expectations or that our directors or executive officer. Forward-looking statements also include information concerning our possible or assumed future results of operations, as well as statements proceded by, followed by, or that include the words “believes”, “may”, “will”, “continues”, “expects”, “anticipates”, “intends”, “plans”, “estimates” or similar expressions. Forward-looking statements are not guarantees and assumptions because they relate to future events and therefore depend on circumstances that may or may not occur. Our future results and shareholder values may differ materially from those expressed in or suggested by these forward-looking statements. Many of the factors that will determine these results and values are beyond our ability to control or predict.
