1

Our Business

Cultivate & Evolve

SLC AGRÍCOLA

SLC AGRÍCOLA

Our Business

What?

Production of **cotton**, **soybean**, **corn**, **seeds and cattle finishing**.

Where?

In **8 states** of the Brazilian *Cerrado* Region.

How?

On both **owned** and **leased** land, large scale farms.

To Whom?

Grains: Tradings, Animal Feed and Food Ind.

Cotton: Tradings and Textile Ind.

Seeds: Agricultural Producers.

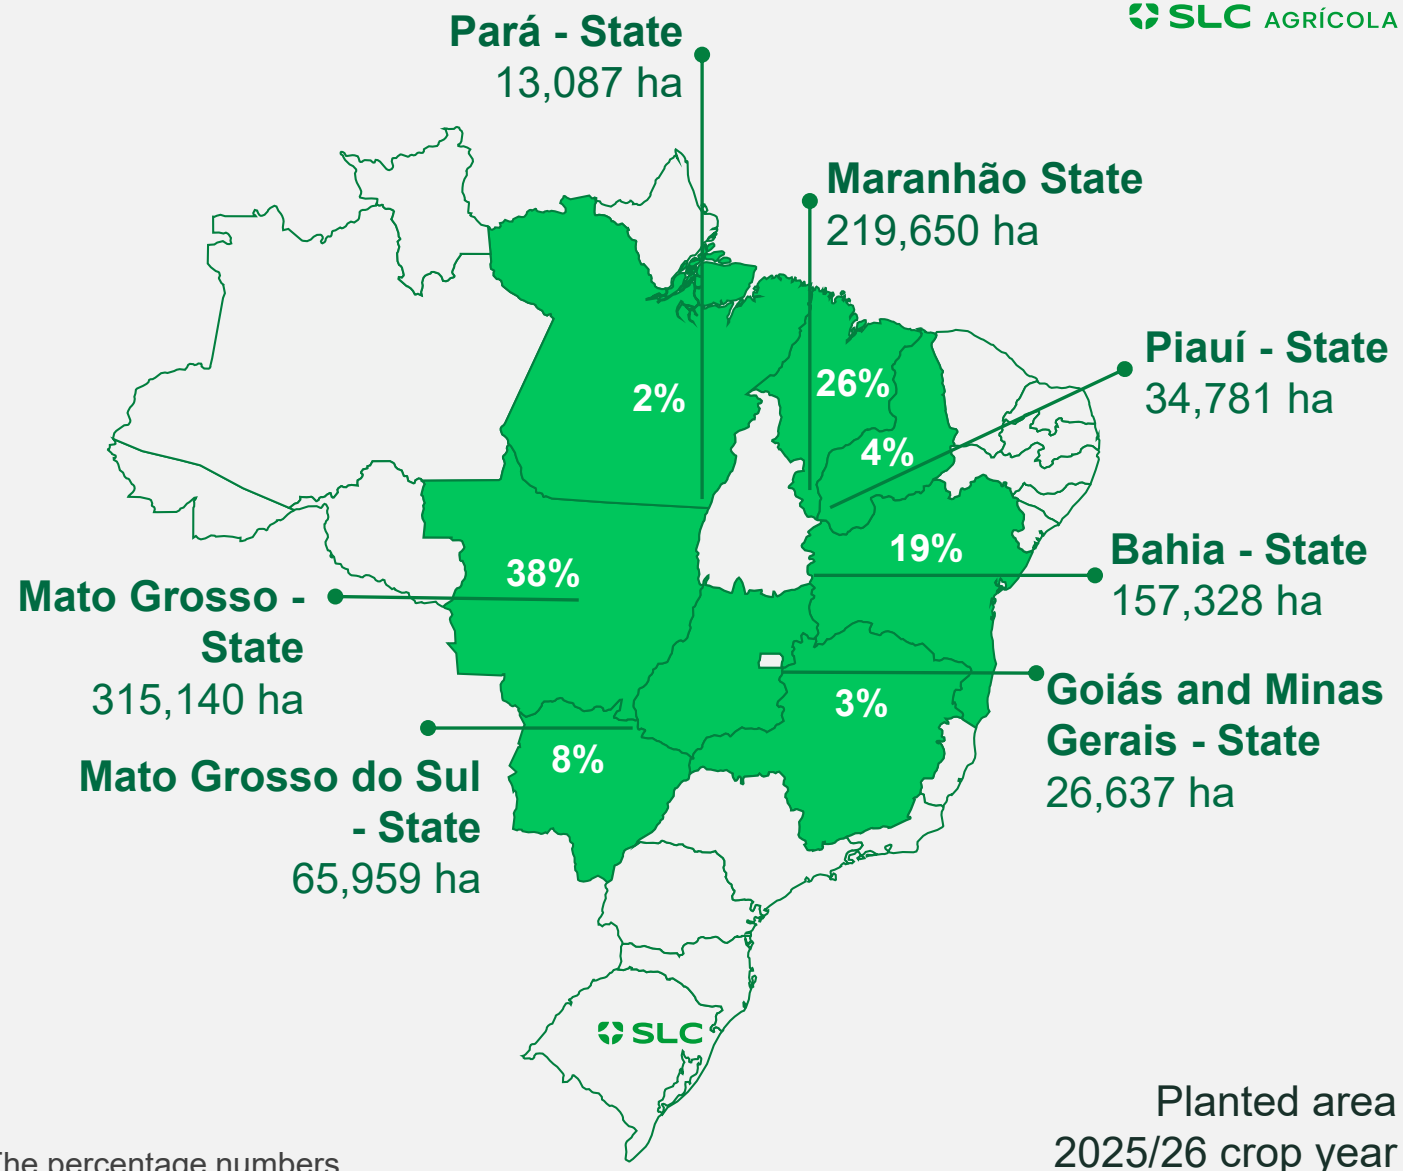

Cattle: Food industry and meat processors

Strategically positioned Farms

A portfolio resilient to climatic variations

26 Farms
distributed throughout the brazilian *cerrado*

3.5% of **total** physical area is **irrigated**

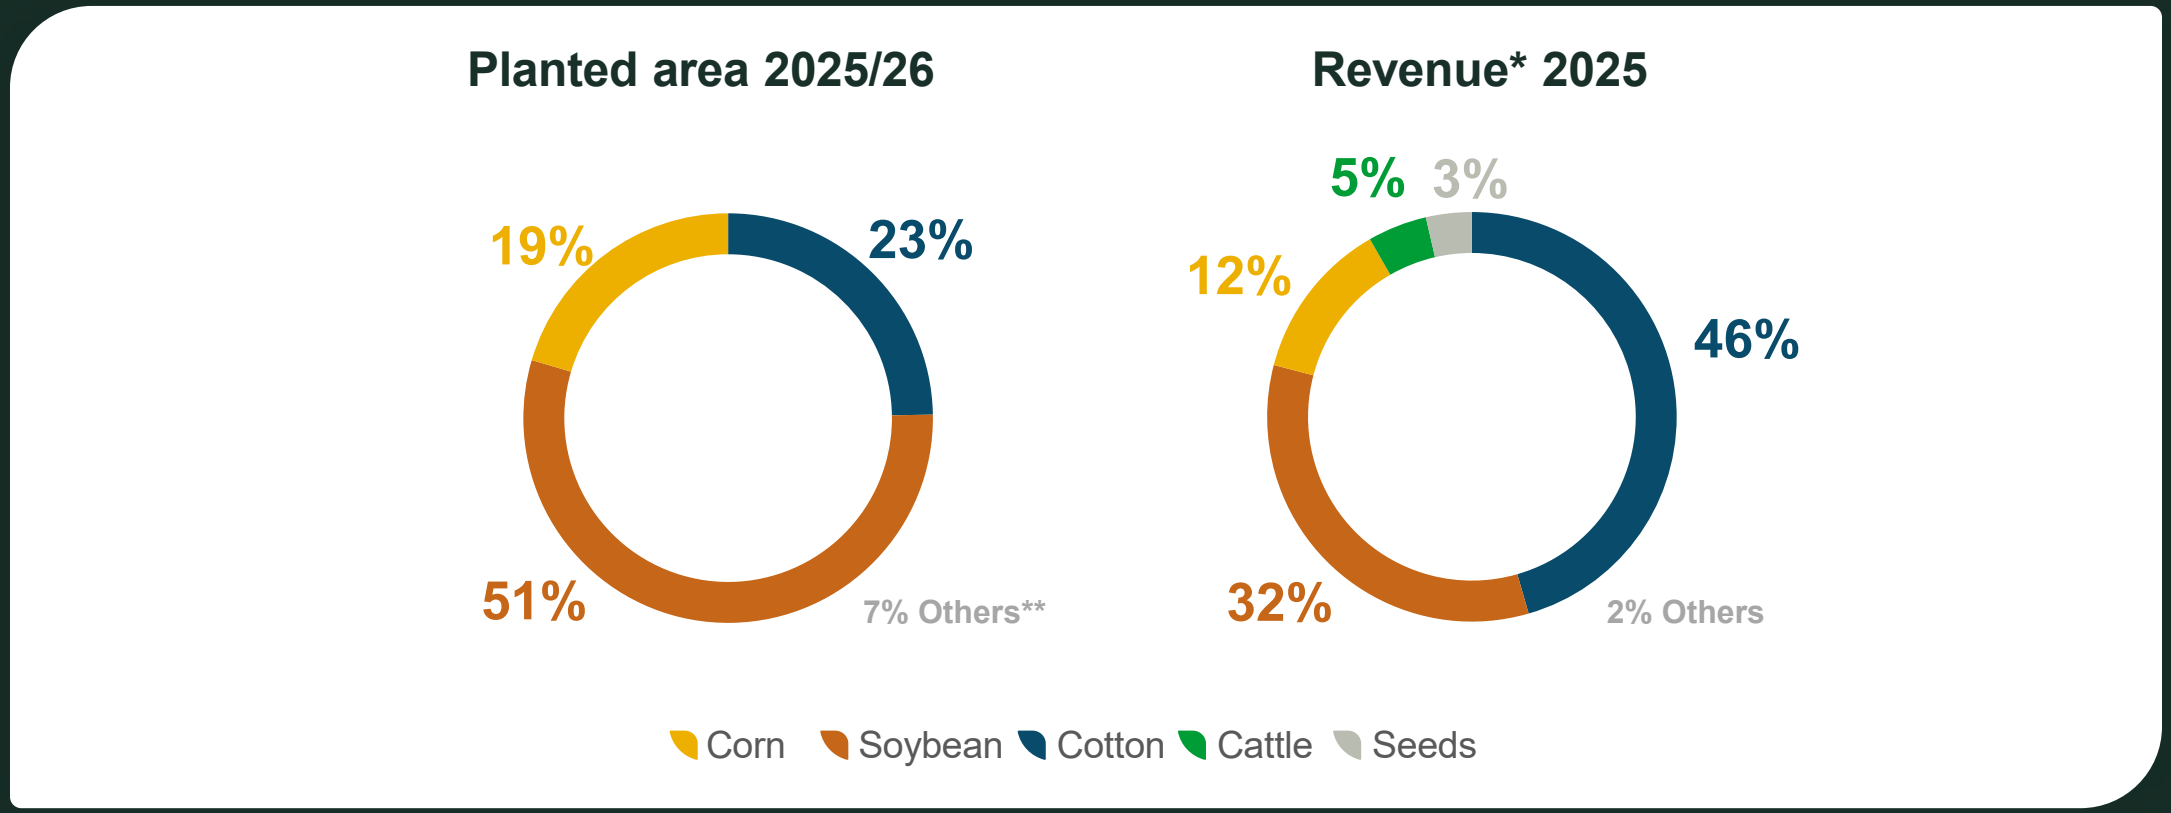

The percentage numbers represent the planted area of each region in relation to the Company's total.

Planted area
2025/26 crop year
832.6 K ha

Source: 2Q26 Release

Breakdown per crop

A diversified and flexible portfolio

Source: 2Q26 | 4Q25 Release
*In revenue, cotton contains cotton seed and cottonseed;
** Other crops: Brachiaria, Sorghum and other.

7

Strategy & Capital allocation

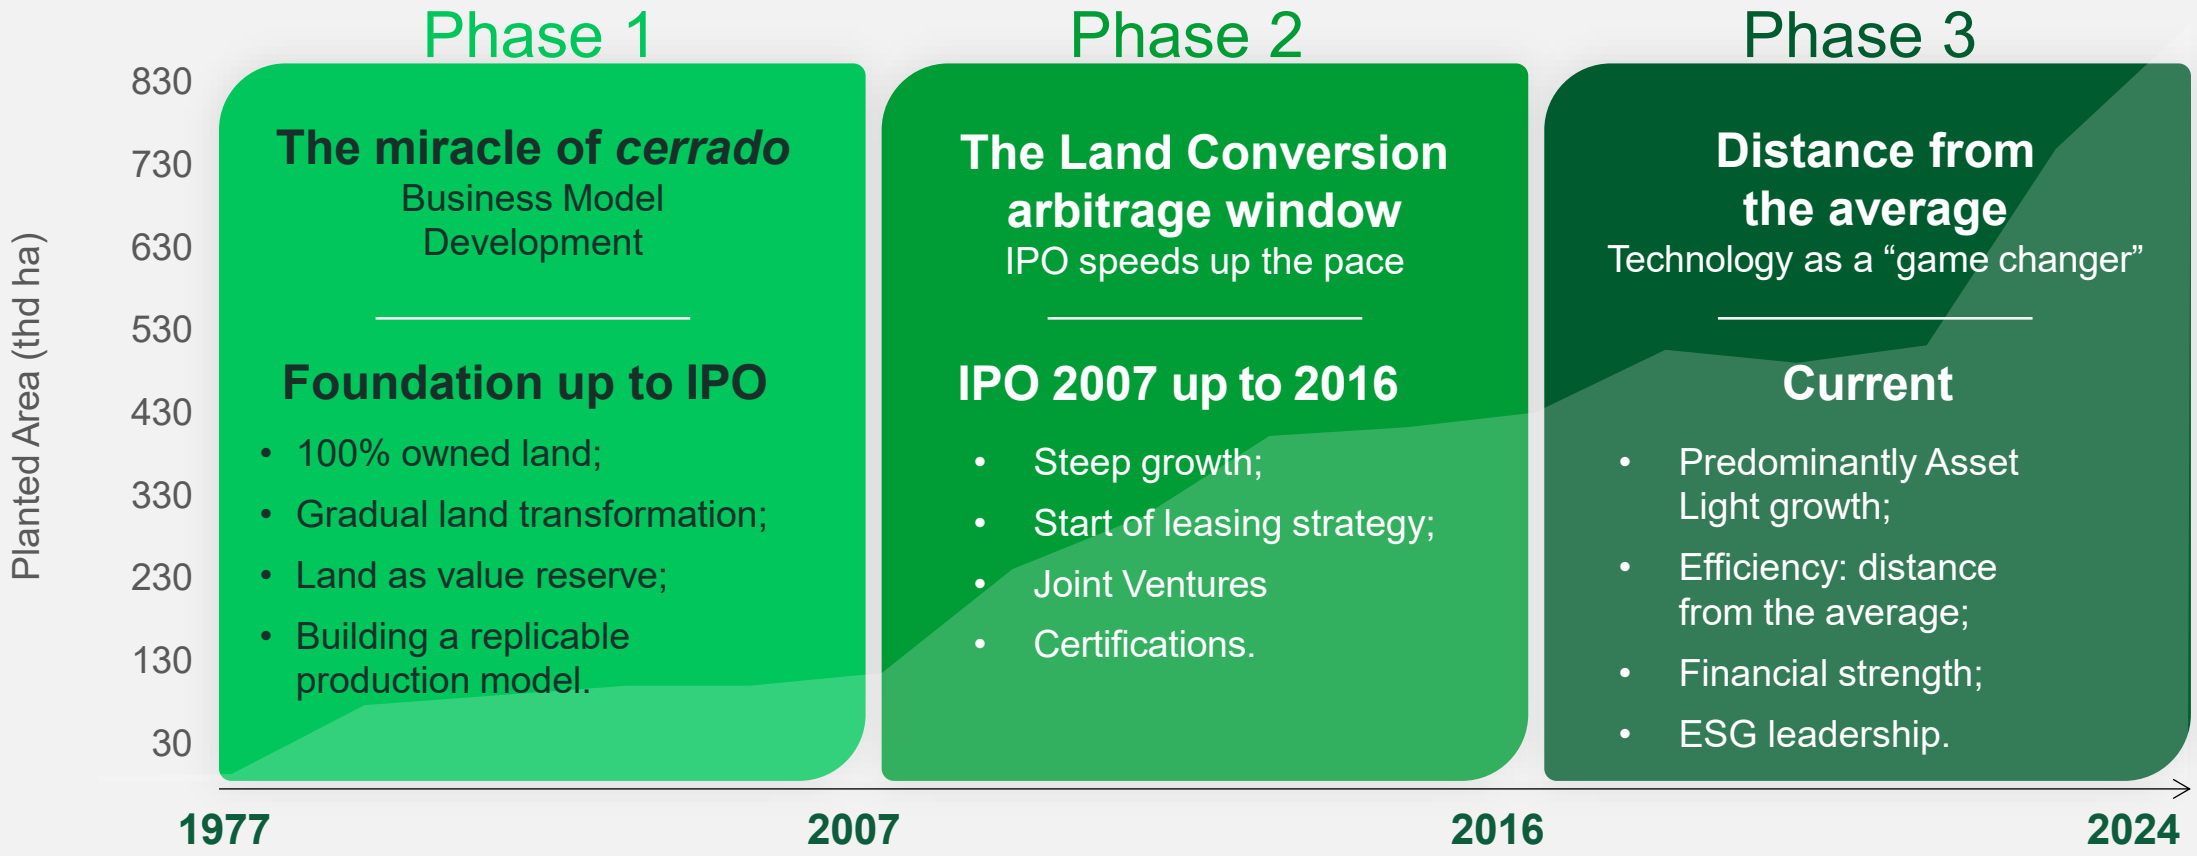

Cultivate & Evolve

SLC AGRÍCOLA

Our strategy in 3 phases

SLC has made great use of the main opportunities in Brazilian agribusiness in recent decades

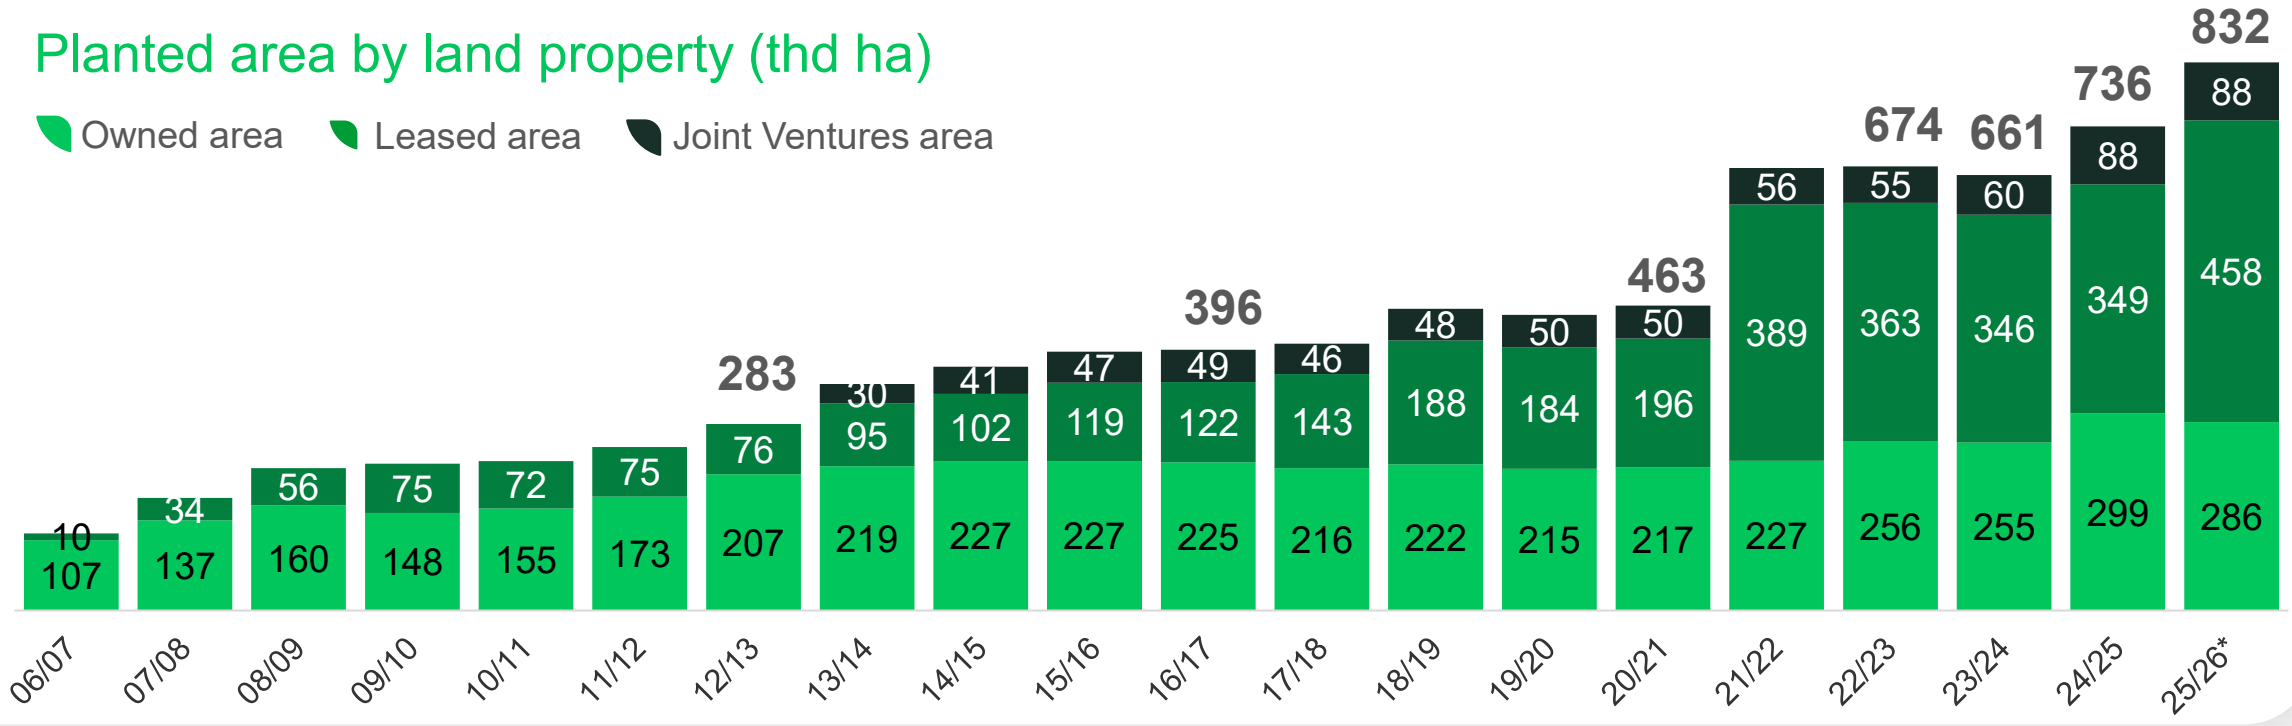

Migration to asset-light model

In the 2025/2026 crop year:

63% of physical area comes from leasing & joint ventures (1st crop)

Planted area by land property (thd ha)

Source: 2Q26 Release

*Forecast

The Company considers the leased area as: leased area of the first crop plus the first crop area of the Joint Ventures, divided by the total planted area of the first crop = 63%

Capital allocation

Growth in mature areas with high productive potential

Pasture conversion

Dividend payment

Shares buyback

New projects

Digital Evolution and Transformation

From traditional agriculture to smart and sustainable agriculture.

AGRICULTURE 1.0

- Labor intensive
- Low productivity

AGRICULTURE 2.0

- Green Revolution
- Genetic improvement
- Use of pesticides and fertilizers
- Agricultural machinery

AGRICULTURA 3.0

- Precision agriculture
- Global positioning systems
- Biotechnology
- Agricultural software applications

AGRICULTURA 4.0

- Cloud computing
- Sensor networks
- Drones
- Satellite imagery
- Big Data
- Mobile applications

AGRICULTURE 5.0

- Artificial Intelligence
- Robotics
- Synthetic biology
- 3D and 4D printing
- Vertical farming

BEFORE 1950

1950

1990

2015

PRESENT

PRECISION AGRICULTURE

- 2003 —  Soil sampling on a grid and variable rate of nutrients
- 2008 —  Correction signals – receivers and monitors
- 2015 —  Productivity maps
- 2018 —  Selective application sensors
- 2019 —  Variable rate of seeds
- 2021 —  Systematization projects
- 2024 —  Management zones
- 2025 —  Nutrient recommendations

DIGITALIZATION

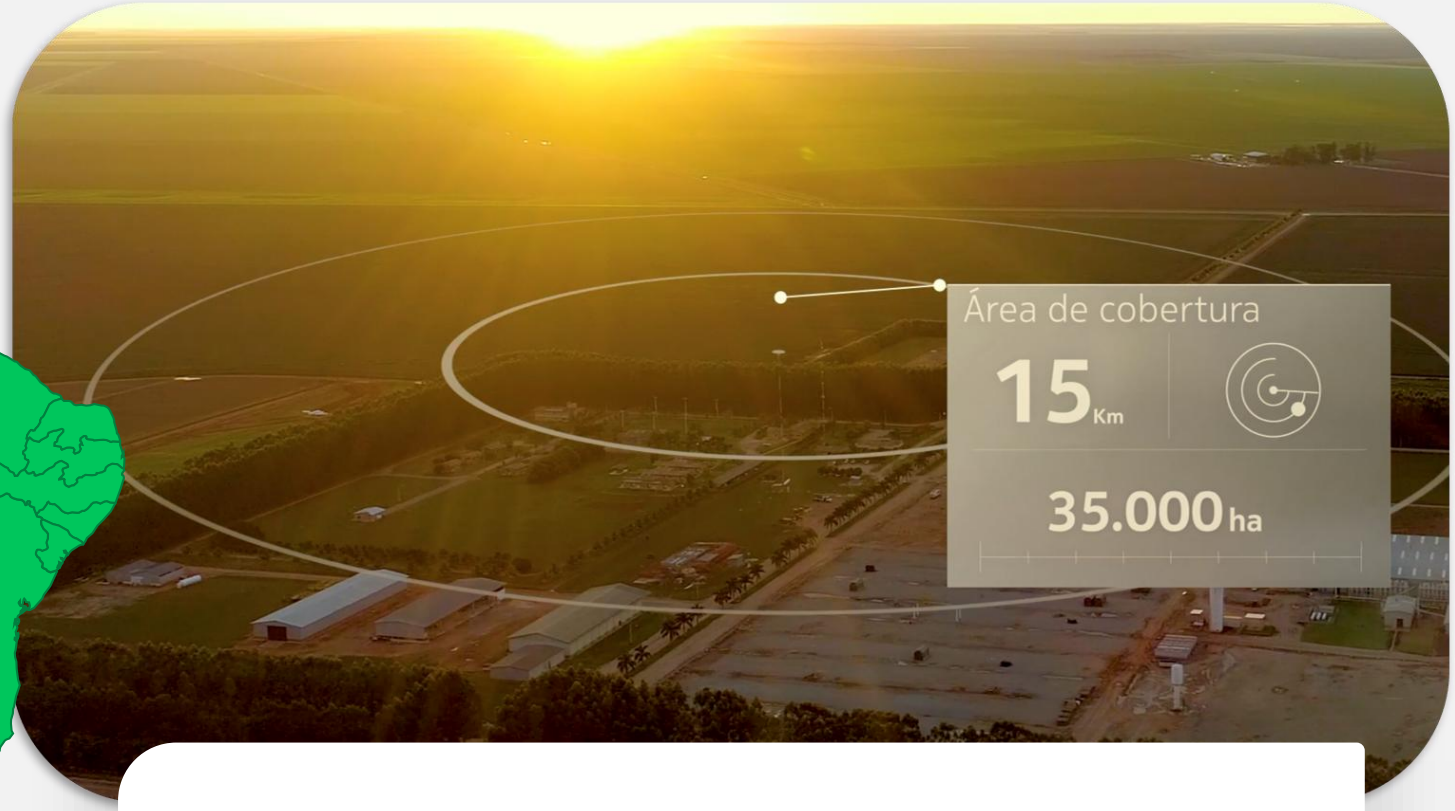

- 2000 —  Farm Management System
- 2002 —  Irrigation management
- 2017 —  Georeferenced API | Localized application
- 2017 —  Satellite imagery
- 2018 —  Aerial application management
- 2020 —  Telemetry
- 2020 —  Weather stations

TECHNOLOGY AND PROCESSES

- 2018 —  Connectivity
- 2018 —  DigitalLabs | Agricultural Intelligence Center
- 2019 —  BI – Business Intelligence
- 2020 —  Innovation management
- 2021 —  Data lake
- 2023 —  Artificial intelligence
- 2023 —  Application drone
- 2025 —  Monitoring tower
- 2025 —  Autonomous machines

Connectivity

24 Farms

fully connected in all fields with 4G signal.

SLC AGRÍCOLA

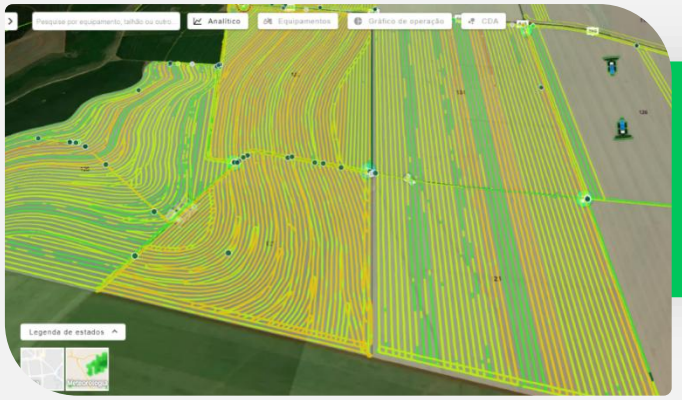

Spraying operation

Adjusting engine speed **(rpm)** and reducing fuel consumption

Reduction in fuel consumption:
0.79 to 0.58 L/ha

-27%

Before

Pantanal Farm

Yellow and orange colors indicate higher engine rotation > higher fuel consumption.

After

RPM reduction of 2,100/2,300 to 1,500/1,900.

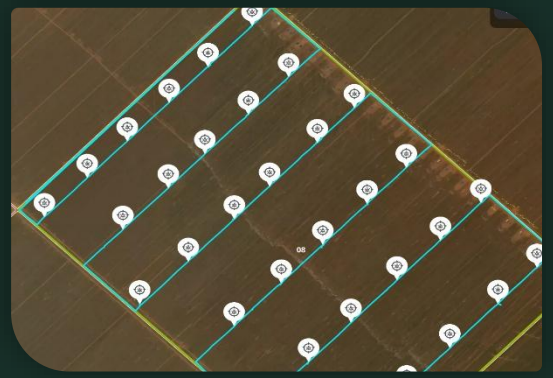

Savings with digital agriculture

Localized application

Harvest 2024/25 responsible for **80% of crop protection savings in 382k ha applied with precision agriculture**.

Localized application

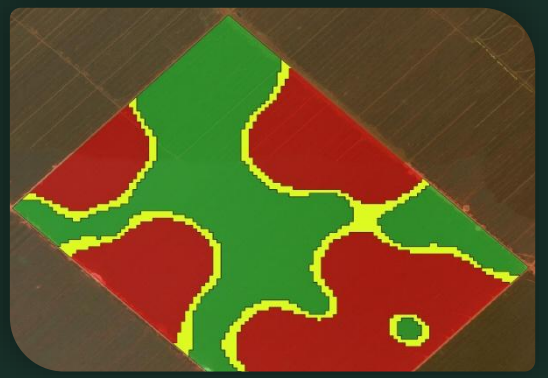

Distribution of points and sample density

Pest diagnosis map

Prescription of localized application of crop protection

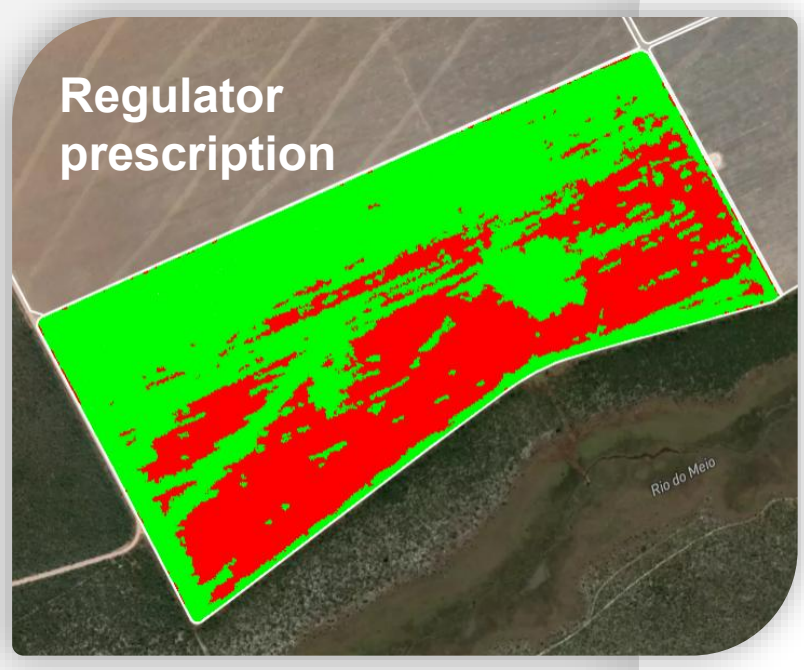

Area not applied

Area of application

NDVI Maps | Aplication regulator and site-specific application of defoliants

Daily satellite images provide generating prescriptions based on vegetation indexes

Variable-rate application of cotton growth regulator and site-specific application of defoliants for soybean and cotton.

In 2024/25, **64,062 ha** applied with imagery (**satellite image**).

Higher regulator dose

Lower regulator dose

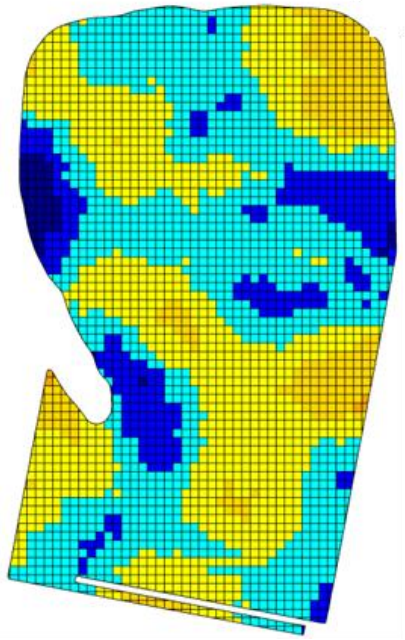

*The company does not use NDVI maps for productivity estimates.

Precision agriculture

Fertility Variability Maps

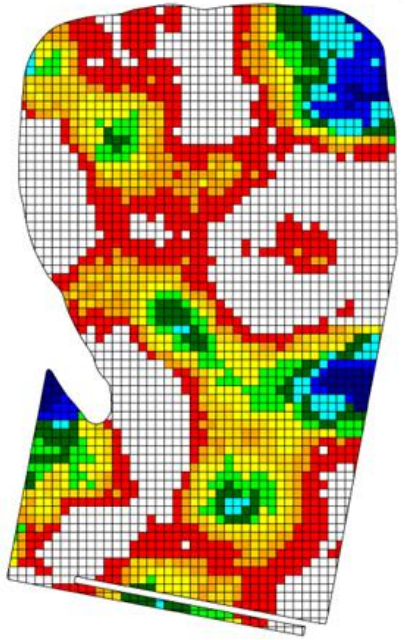

100% of SLC Agrícola's crops **already mapped** in precision agriculture.

Fertility variability map

- Low fertility
- Adequate fertility

Fertilizer prescription at variable rate

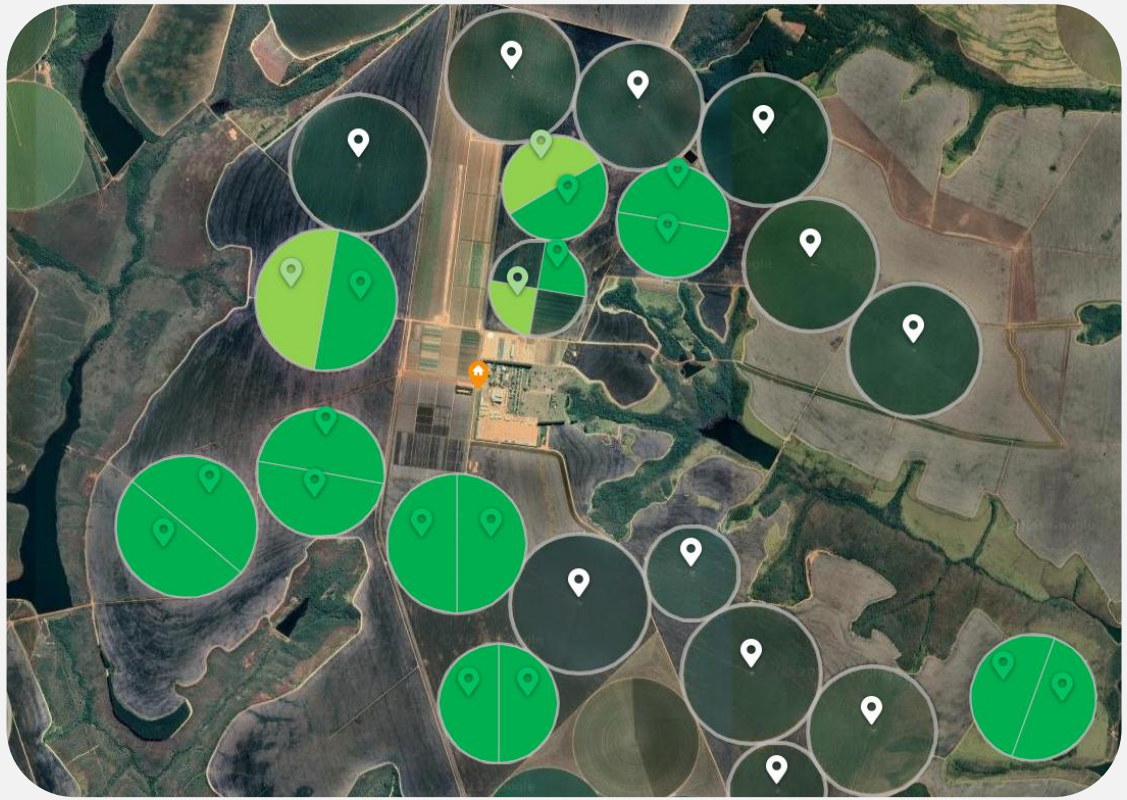

- Increased productive potencial
- Cost reduction

Related to the 2025/26 crop year.

150 Monitored Pivots in 19k hectares

Irrigation automation and recommendation solutions

Operational Control Tower

WHAT IT IS

- **Performance monitoring**
- **Real-time operational management**
- **Decision tree** *(escalation matrix)*
- **Visibility and Predictability**

PURPOSE

- **Strategic:** develop the operational plan and planning assumptions.
- **Tactical:** ensures execution of the plan, oversees field operations, and manages productivity deviations.
- **Operational:** executes field activities according to agreed timelines, quality standards, volumes, and safety requirements.

Savings with digital agriculture

Localized application

Localized application through sensors present in **21 Farms**.

Cost reduction with crop protection.

Sensors identify weeds and apply herbicide in real time.

67% savings in over 227k ha in 2024/25 crop year.

Spraying drones

Localized application

Capacity:
up to 40 liters.

Autonomy:
8 – 12 minutes.

Performance:
12 to 20 ha/h.

Precision crop protection application.

Weed monitoring with drone imagery.

9 drones currently operating.

SLC AGRÍCOLA

Eletric & autonomus plane

Pelican Spray

- **Day and night** spraying.
- **70-80 hectares/hour** (operation performance like a self-propelled sprayer).
- **Similar cost** to aerial spraying.
- 2026: **3 drones** operarating.

TECHNOLOGY & INNOVATION

SLC AGRÍCOLA

Leopard

Autonoumous robot

- Autonoumous robot for monitoring and detecting pests;
- Daytime and nighttime operation;
- Embedded Intelligence;
- In final stages of development;
- Evolution of sample density and autonomy in the field.

TECHNOLOGY & INNOVATION

SLC AGRÍCOLA

Leopard

Autonoumous robot

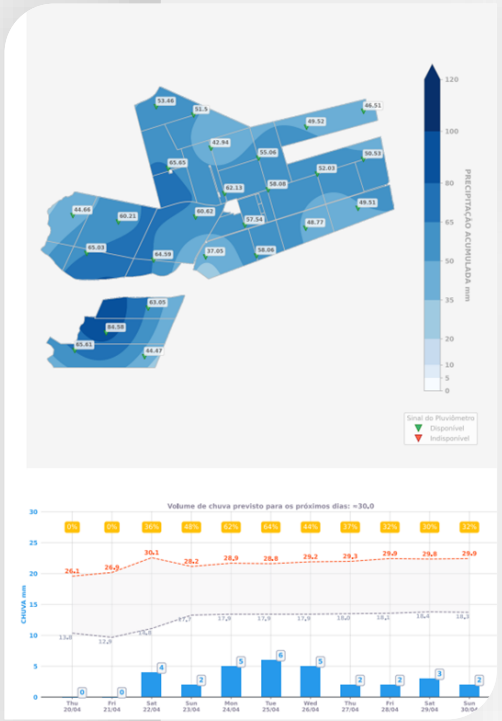

Climate management

Quick decisions, e.g.: firepower to plant or harvest.

Available for all units in the **mobile version**.

Automated report with interpolated precipitation maps and forecast for the next few days.

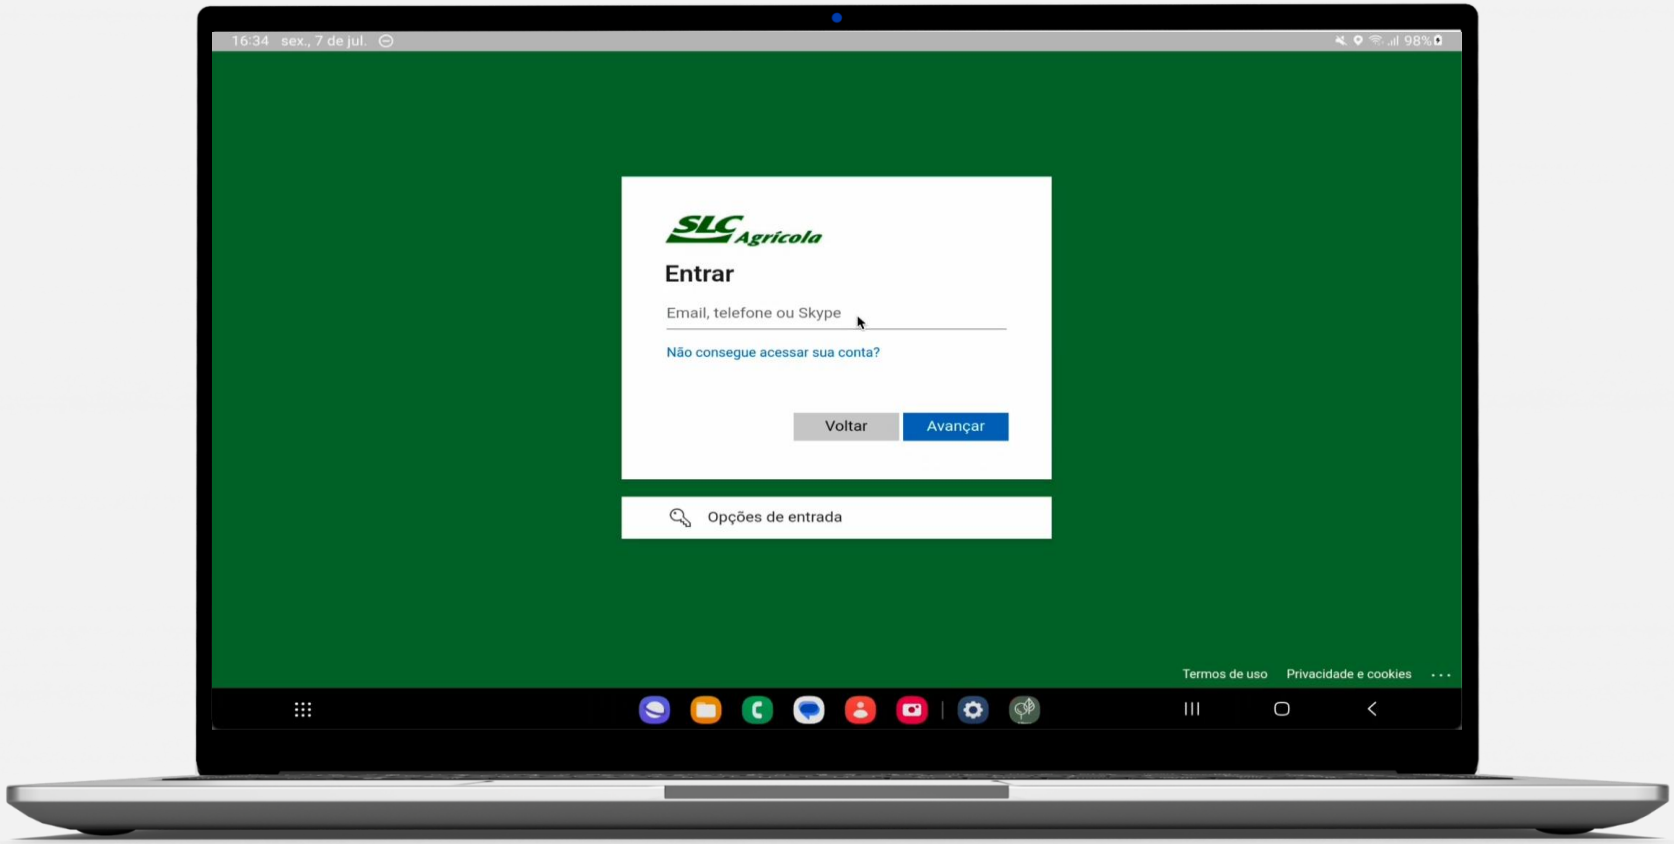

digital rain gauge

weather station

Field notebook

Operations management

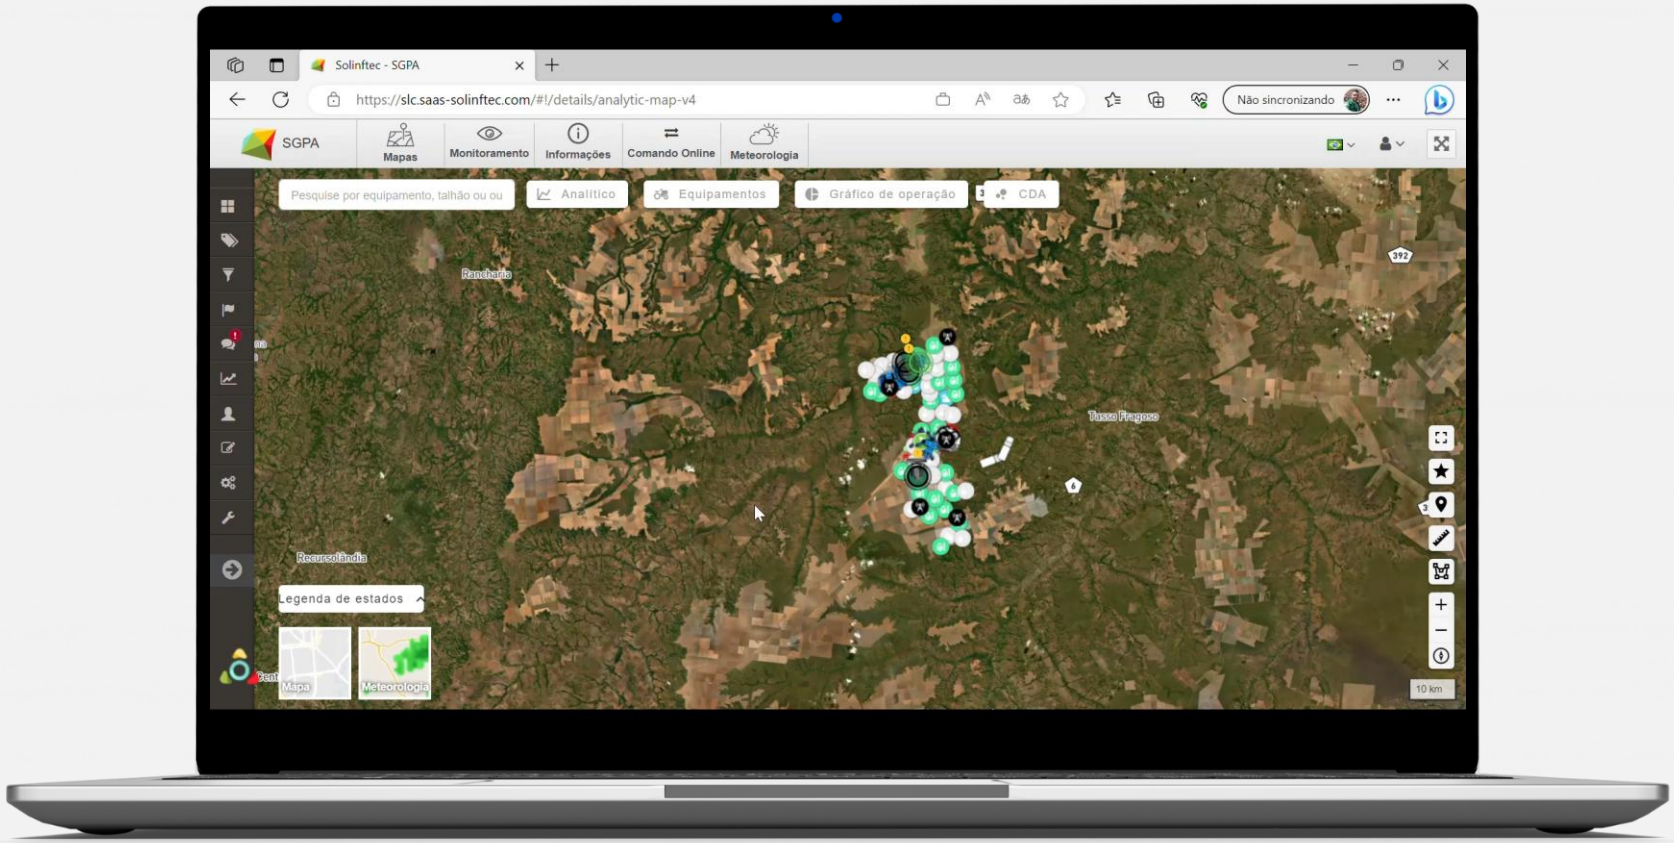

CENTRO DE OPERAÇÕES MECANIZADAS

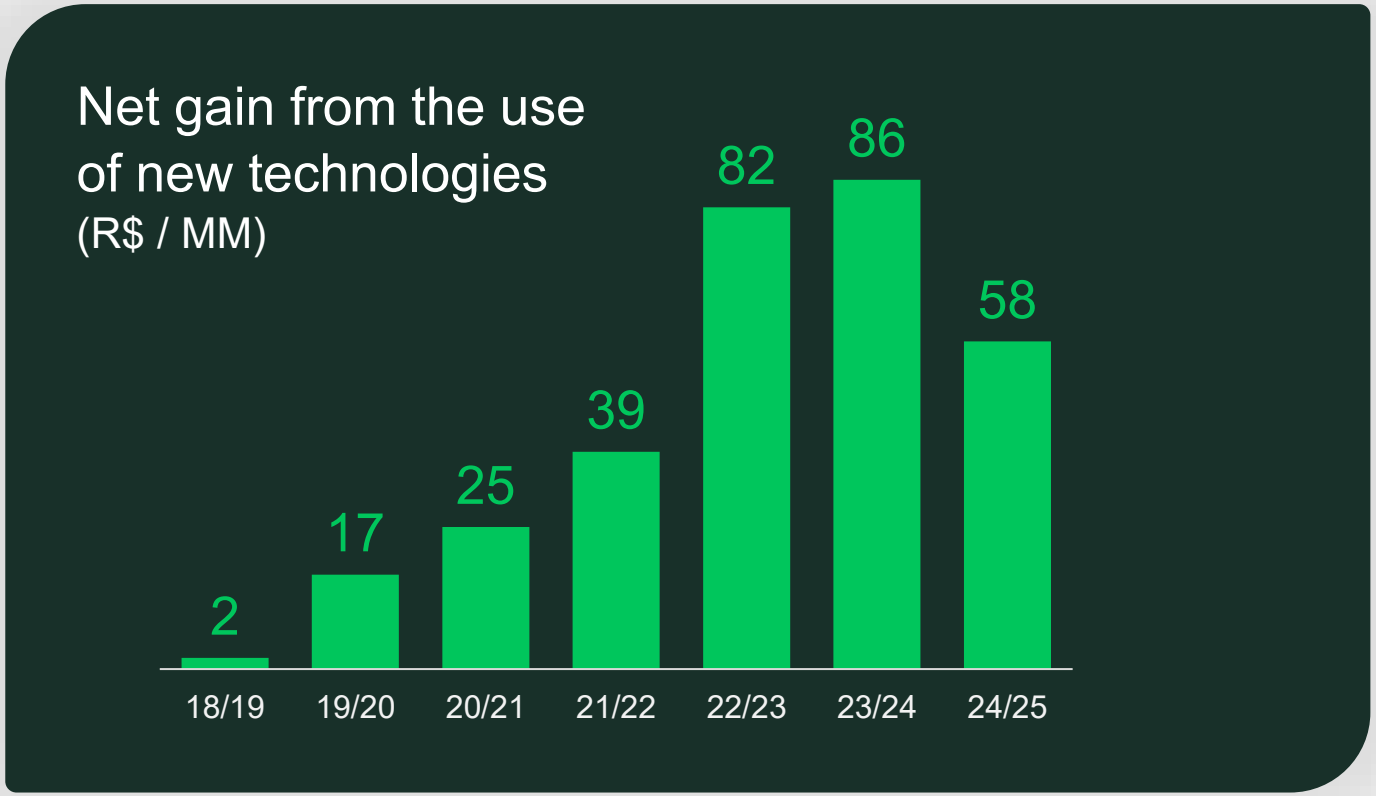

SLC AGRÍCOLA

Telemetry

Online Monitoring

Savings with Digital agriculture

- **Remote** sensing;
- **Localized application**;
- **Digital pest** recording;
- ROI implied: for each R$1 invested; we obtained a **net return of R$ 12.50**

WeedIt, Agrocad, Protector, Explorer, Siga and others.

Our commitments

Reduction of greenhouse gases

By 2030 - our goal is to achieve **carbon neutral** emissions of ghg gases scope 1 and 2, through investment in new technologies in the field and agroindustry.

End of the cycle of opening new areas for crops in Brazil

As of the 2020/21 crop, we **ended the cycle of opening new areas** for crops, following the global movement to combat climate change.

Greenhouse Gas Emissions Reduction Program - GHG

Carbon neutral in net emissions of scopes 1 and 2 until 2030

Registro Público de Emissões
Programa Brasileiro GHG Protocol

12 RESPONSIBLE CONSUMPTION AND PRODUCTION

13 CLIMATE ACTION

15 LIFE ON LAND

- End of the native areas conversion cycle.
- Soil Conservation and Green Fertilization Project.
- ILP Project (Integration Crop Livestock).
- Digital Agriculture of Low Carbon Project.
- Reforestation Project with Native Vegetation.
- Project Use of Energy from Renewable Sources.

SLC AGRÍCOLA

Regenerative agriculture

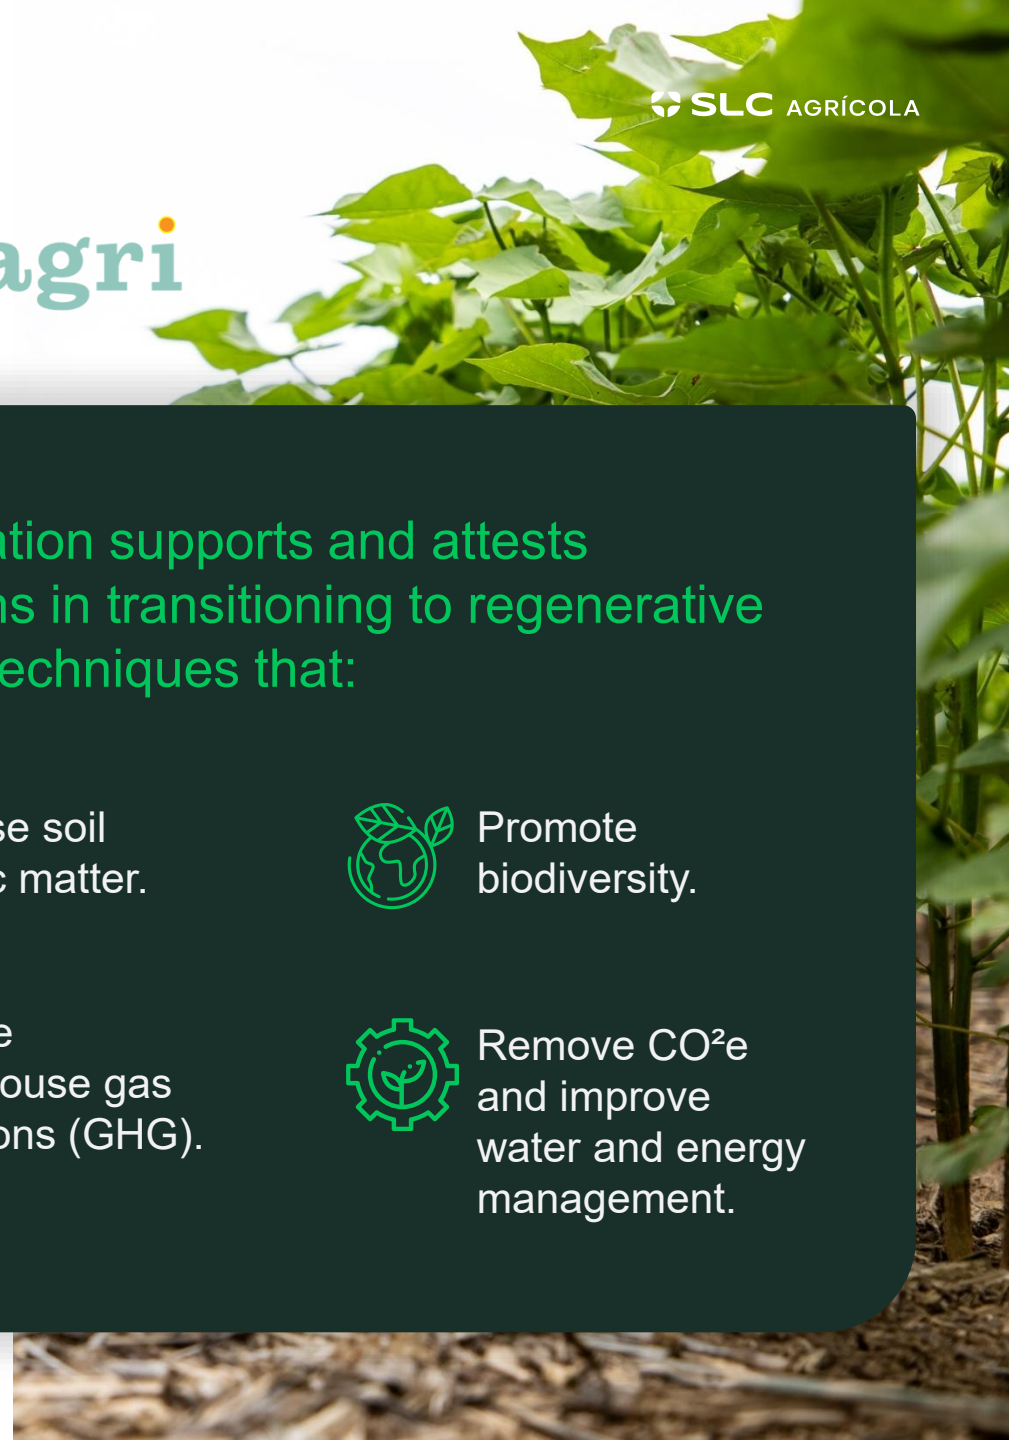

regenagri

We are **the largest company in certified regenerative** agriculture area in soybean and cotton in the Americas.

325,000 ha certified

The certification supports and attests organizations in transitioning to regenerative agriculture techniques that:

- Increase soil organic matter.
- Promote biodiversity.
- Reduce greenhouse gas emissions (GHG).
- Remove CO^2e and improve water and energy management.
